University of Alaska Fairbanks Electrical and Computer Engineering Department EE693-Robot Modeling and Control Fall 2011 REVISED (received5/16/2011, jbh)

SYLLABUS AND COURSE INFORMATION

Lecture Time: TR (5:15-6:45 PM) Room:TBA

Catalog Description:

Introduction to basic concepts in robotics; homogeneous transformations; Denavirlartenberg parameters, forward and inverse kinematics; velocity kinematics, Jacobiens; dynamics and modeling; robot control: independent joint control, multivariable control, Lyapunov stability, PD+, computed torque, inverse dynamics control with the use of Matlab/Simulink, kinematics and control related demonstrations or PUMA 560 manipulator.

Prerequisites:

University of Alaska Fairbanks Electrical and Computer Engineering Department EE693 – Robot Modeling and Control

Fall 2011

There will be a course project that use ATVLAB/SIMULINK. Students are expected to present their project work and results in the form of a technical reports students can use the contemutacilities at SOECAL, and at DU 530
